

Morning Chris,

The quality of street trading units has been raised numerous times and a gazebo does not provide a high quality solution. The re-design of Kings Sq and significant uplift and investment which is occurring in this locality means in turn we should be seeking for street traders to be bringing well designed and high quality units into the historic city centre.

Could I recommend that we would be happy to have this unit as part of food festivals and other events in the city rather than on a regular basis as proposed?

Best Wishes,
Charlotte

Subject: Street trading application - The Oxbode

Hi both

As you are aware we have consulted on this application twice now.

Part of the process is to explore whether or not there are any options with regard to mediation.

So far you have both objected to the siting of a unit at this location following both consultations.

I am just exploring whether or not here is a compromise to be had.

The applicant is not looking to change times or days of the week but did offer a gazebo as a trading option rather than the unit that he originally applied to site.

Can you let me have your thoughts as soon as.

Many thanks

Chris
