Gloucester City Plan Schedule of Additional Modifications November 2022

The Additional Modifications below are minor grammatical and spelling errors, and non-material changes that have been made to the plan.

They are expressed either in the conventional tracked-changes form of strikethrough for deletions and underlining for additions of text. In the interests of being succinct, only those paragraphs that have been amended are shown within this schedule, i.e. unchanged text paragraphs will not be shown below. Main Modifications are also shown where they are contained within the specific paragraph; further details are available in the Main Modification schedule.

or unless agreed with the $\epsilon \underline{C}$ ity Council. Where watercourses or
dry ditches are present within a development site, these should
be retained and, where 76 possible, enhanced. Enhancement
nt measures could include removing redundant structures,
improving fish passage and restoring watercourses to more
natural alignments by improvingly hydromorpholoy. All
measures can contribute to achieving 'good' status as required
under the Water Framework Directive. Access to drainage
features for maintenance should be retained and ownership of
l as land clearly defined as part of the site maintenance plan. The
l removal of natural drainage features may result in an increased
nect need to connect to the public sewerage network, and therefore
ry to be contrary to the SuDS / drainage hierarchy.
Development that may have direct and indirect impacts on
(SAC) watercourses used by the Special Areas of Conservation (SAC)
and Ramsar species, which will be subject to a Habitats
Regulations Assessment (HRA).
icts There is planned growth in housing development in districts
surrounding the Cotswold Beechwoods Special Area of
el of Conservation (SAC), which could lead to an increased level of
ite. recreational pressure resulting from people visiting the site.
Due to the extent of the Beechwoods and the fact that visitors
travel a significant distance to visit the site, a Gloucestershire
wide approach is required in order to successfully mitigate andy
likely adverse impacts.
The Gloucestershire planning authorities commissioned a
rder visitor survey, carried out over the summer of 2019, in order to
AC. better understand the recreational pressures on the SAC. The
iding survey results will form part of the evidence base leading to the
ify production of a mitigation strategy. This will identify what
