

Gloucester City Council Open Space Strategy 2020-2025

Gloucester City Council Open Space Strategy 2020-2025

- 1. Foreword
- 2. Executive Summary
- 3. Introduction and Key Themes
- 4. Review of previous strategy
- 5. Vision and Objectives
- 6. Policy Background/population growth
- 7. Open Space Standards
- 8. Open Space assessment and analysis
- 9. Working with partners and the community
- 10. Funding
- 11. Monitoring and review
- 12. Appendices
- Appendix 1 Ward Maps and breakdown of open space by quantity & type
- Appendix 2 Summary of Open Space Site Quality and Biodiversity Value Assessments
- Appendix 3 Summary and Analysis of Community Value Assessments
- Appendix 4 Summary and analysis of Play Area Assessments

1. Foreword

I am delighted to be able to introduce Gloucester's latest Open Space Strategy, which will cover the period 2020 to 2025.

From sports fields and playgrounds to formally managed parks and natural landscapes, the city of Gloucester can boast a rich diversity of publicly accessible open spaces.

Gloucester's open spaces provide residents and visitors with opportunities for formal and informal recreation, and daily contact with nature. Open spaces provide venues for sports, social events, entertainment, relaxation and celebration. Our open spaces are democratic places where people from our City's many diverse communities can come together to rest and play

Open spaces also form part of a vital biodiversity network, providing habitat for wildlife and bringing the countryside into the heart of the city. Over the next five years the council will be embarking on an exciting programme of biodiversity and habitat improvement schemes aimed at making our green spaces even more wildlife friendly.

Green spaces also provide areas where natural processes like evaporation and the interception of water run off can occur. These natural processes will become even more vital in the future in helping to protect our City and its residents from the effects of climate change.

The city council has significantly invested in park improvements in the past decade and will continue to improve facilities utilising funding contributions from developers and grant giving bodies where available.

Gloucester is proud to be the first Bee Guardian City, planting flower meadows to provide food for wildlife and we also fly the Green Flag Award for quality in three of our parks.

We are pleased to be able to work with many partner organisations, groups, residents and volunteers who, like us, are committed to enhancing and protecting our green spaces for future generations, to create a strong and resilient natural environment for Gloucester.

Councillor Richard Cook, Leader, Gloucester City Council and Cabinet Member for Environment

2. Executive Summary

The open space strategy sets out how Gloucester City Council plans to protect, manage and enhance its open spaces over the next five years and beyond.

Purpose of the Open Space Strategy

The strategy has a threefold purpose, it provides;

- a sound body of evidence for developing robust, sustainable open space policies within the proposed City Plan;
- a series of objectives for council officers and partner organisations to work towards and;

• a clear understanding, for city residents, of the city council's open space aspirations and open space priorities, including opportunities for residents to get involved in caring for their local green spaces.

The importance of green space

The contribution that good quality, safe and accessible open spaces can make to the overall quality of life within a community is well documented. There are numerous health, social, cultural, environmental and educational benefits.

The city has a wide range of open spaces including natural wild space, formal sports grounds, parks and play areas. It's important that there is a clear and sustainable plan for looking after all of these spaces, to ensure their long-term protection, care and enhancement.

Key facts about Gloucester's open spaces

- There are over 200 areas of public open space in the city, including formal and informal green spaces, allotments, cemeteries, Robinswood Hill Country Park and Alney Island Nature Reserve, a total open space area of over 550 hectares.
- There are six designated Local Nature Reserves (LNR) and two Sites of Special Scientific Interest (SSSI) in the city.
- Almost 14% of the city's total land area is publicly accessible green space.
- There are 52 formal children's play areas in the city. The city council manages 46 of these. Over £750k has been invested in upgrading play areas between 2014-2019.
- There are some larger sports grounds and facilities that serve the city as a whole, such as the Oxstalls Sports Centre/Plock Court outdoor pitches and Blackbridge Jubilee Athletics track.
- Between April 2014 (when the previous strategy was adopted) and October 2019, the council has secured, through the planning process, an additional 15 hectares of new open space and over £2million for improvements to existing parks and open spaces across the city.

Key themes of the Open Space Strategy

The document assesses the existing quality and quantity of open space provision within the city. In terms of overall open space provision, it identifies that the distribution of open space across the city is adequate, but rather uneven.

Due to the densely built-up nature of many of the city's residential areas, creating additional new open spaces where there are shortfalls will not be possible. Instead the strategy seeks to improve the quality of facilities and accessibility to existing green spaces, as well as providing residents with plenty of information about parks and recreational opportunities in adjacent areas.

Since the publication of Gloucester's previous Open Space Strategy in 2014, climate change and loss of biodiversity have become increasingly important issues. This updated strategy contains measures which seek to enhance the contribution that Gloucester's green spaces make to mitigating the effects of climate change and increase the provision of habitat for wildlife.

Ensuring the city's green spaces are managed and maintained cost effectively and using sustainable practices, is also vital. Inviting the community to help look after some open spaces is important and helps residents develop a sense of ownership and pride in their local parks.

Although many are not directly under the city council's control, protection of playing fields and outdoor sports facilities is also a key priority. Ensuring the council has robust planning policies to protect or mitigate against the loss of open spaces to potential development sites and ensuring there is sufficient new open space provision falls within the remit of this strategy, in conjunction with policies set out in the Gloucester City Plan and the Joint Core Strategy for Gloucester, Cheltenham and Tewkesbury.

Funding the improvements

Council budgets for the management and improvement of open space are limited, so careful consideration must be given to ensure that any works carried out are affordable and sustainable in the long term.

The strategy acknowledges that although funding is limited, there are still opportunities for the council to work with partners, groups and volunteers to deliver safe, active and well managed spaces. Sources of additional external funding will also be secured where possible, including through the planning process.

Conclusion

Gloucester City Council is committed to providing an integrated network of safe, accessible parks and green spaces, where biodiversity and the natural environment are protected and enhanced, and appropriate, high quality, facilities are provided.

Gloucester City Council Open Space Strategy 2020-2025 Executive Summary

3. Introduction and Key Themes

Gloucester's open space portfolio provides a much-valued resource for city residents and visitors. There are places for formal and informal sport and physical activity, reflection, relaxation and daily contact with nature. These places contribute immeasurably to the life of the city and can help improve health and well-being.

Parks and open spaces also represent a substantial biological repository and, through habitat protection, improvement and enhancement schemes, provide an opportunity for the council to help address issues in relation to biodiversity loss. Through processes like evaporation and the interception of water runoff, green spaces also help to mitigate the effects of climate change and help to make the city more liveable.

Protecting and improving the quality of the city's open spaces remains one of the council's top priorities. However, the challenge of budget constraints is ever-present, so continuing to look at ways to work more efficiently and reduce maintenance costs is therefore important.

Gloucester has a growing population, although there are few sites for large-scale residential development left in the city. Demands on urban land for infill sites for housebuilding often means there is added pressure on the city's open spaces. The council has robust policies in place to protect the majority of public and private open spaces, but it also recognises that in some cases allowing the development of small areas of poor quality, inaccessible or marginal open space in return for funds to improve the quality and facilities on sites elsewhere may be appropriate.

Infill and brownfield development is unlikely to generate substantial new open space provision, but contributions from all new housing development can be invested in improving the quality and accessibility of our existing spaces. Additional pressure on open space facilities in Gloucester is also likely from housing developments just outside the city boundary (e.g. Longford, Twigworth and Innsworth) and this has been considered when assessing the impact on existing provision.

This strategy sets out a vision and framework for the city's open spaces. It takes into consideration policies, aims and aspirations contained in other council documents and plans (see list below).

There are no easy answers to these challenges, but this strategy seeks to set down solid principles to ensure that the right decisions are made in future years.

An assessment of the impact of the previous document (2014-2019) is included in Section 4 and updated actions and opportunities for the next five years (2019-2024) are set out in the Delivery Plan at Section 12.

The information presented in this report should be used to inform local plan and supplementary planning documents. It helps to identify priorities for improvement and considers the need future provision as a result of further population increase.

- Aid decision making by Councillors and Officers.
- Support external funding bids and applications.
- Support developer discussion around CIL and S106.
- Support potential work with neighbouring authorities.
- Provide an appropriate evidence base for the emerging strategy City Plan and future reviews of the Joint Core Strategy.

4. Review of previous strategy

The previous five-year Open Space Strategy was approved in April 2014. There were a number of aims and objectives set out within the strategy, many of which were successfully achieved, despite the ongoing financial challenges within in local government. A short summary is set out below:

- An increase in the overall quantity of open space in Gloucester A number of new areas of public open space have been created and laid out as part of residential development sites, with an additional 30 hectares now included in the open space audit.
- Investment of at least £200k per year (£1 million total) in upgrading the quality of open space and facilities

Well over £1 million of capital investment works to playing pitches, play areas, parks drainage and infrastructure have been completed in Gloucester's parks since 2014.

- To create or refurbish at least two children's play areas per year (ten in total) Sixteen existing play areas have been refurbished, with a total capital investment of over £550k. In addition to this, seven new play areas have been created across the city.
- Increase community involvement in open space management by providing support to new or existing Friends and community groups

The council continues to work closely with a number of Friends groups and other agencies across the city and has supported groups such as Podsmead Big Local and Friends of Elmbridge, who have raised external funds for play area improvements.

• Increase to three parks achieving the Green Flag Award In 2014 Gloucester had one Green Flag Park, at Barnwood Park and Arboretum. In 2019, Gloucester has three Green Flag Parks, the two additional sites being Robinswood Hill Country Park and Saintbridge Pond and Allotments.

- **Publish and implement a Playing Pitch Strategy for Gloucester** The council formally adopted its Playing Pitch Strategy in January 2016 and has been working to implement the Acton Plan since then. A Built Facilities Strategy is also in progress.
- **Publish an Allotment Strategy for Gloucester** The council formally adopted its Allotment Strategy in December 2014 and continues to work closely with allotment associations and plot holders. A review of the Allotment Strategy is planned in 2020.
- Ensure policies are put in place in the council's City Plan to protect existing open space and playing fields and to help negotiate new open space in housing development The City Plan (Pre-Submission consultation draft published Sept 2019) contains appropriate policies to protect existing open spaces in the city and secure the provision of new open space as part of future housing developments.

5. Vision and Objectives

Open Space Strategy 2020-2025

Vision - To create and maintain a diverse network of good quality, sustainable and accessible open spaces which serve the needs and aspirations of the residents of Gloucester and facilitate frequent contact with the natural world.

Objectives - 2020-2025

- To promote Gloucester's open spaces as attractive places to sustain and improve physical and mental health & well-being.
- To utilise green space to help mitigate the effects of climate change and biodiversity loss, through habitat creation and management, increased tree planting, water management schemes and other appropriate measures.
- Review the council's grounds maintenance contract and identify opportunities for less intensive open space management, to increase biodiversity, sustainability and ensure best use of available resources.
- To continue to improve the quality and provision of the council's formal outdoor sports pitches and facilities through the council's Playing Pitch Strategy Action Plan.
- To ensure that planning policies are in place in the council's City Plan (and the Joint Core Strategy) to protect existing open spaces and playing fields, to create high-quality open spaces, link new communities and provide effective green infrastructure for new housing developments, both within and just beyond the city boundary.
- To encourage greater community and partnership involvement in managing and developing the city's green spaces especially through Friends and other community groups.

(continued on next page)

Open Space Objectives 2019-2024 (continued)

- To develop site improvement plans or site management plans for larger/priority open spaces and those sites with the greatest potential for increasing biodiversity.
- To maintain Green Flag status for existing sites and to seek opportunities to increase the number of Green Flag parks in Gloucester.
- To continue to invest in developing high quality open spaces and facilities including use of external funding wherever possible.
 - To regularly review the city's open space portfolio to ensure that funds and resources are focused primarily on land which is owned by the council, and to identify council owned sites or areas for investment, disposal or alternative use, investing any income directly back into park infrastructure

•

6. Policy Background/population growth

National Policy

National planning policy is set out in the revised National Planning Policy Framework (NPPF, 2018) and associated planning policy guidance. The NPPF states that open space, which includes all open space of public value, can take many forms and can provide health and recreation benefits to people living and working nearby; have an ecological value and contribute to green infrastructure, as well as being an important part of the landscape and setting of built development, and an important component in the achievement of sustainable development.

The NPPF recommends that local authorities robustly assess the need for open space, sport and recreation facilities and opportunities for new provision in their area. Assessments should identify specific needs and quantitative or qualitative deficits or surpluses in the local area, taking into consideration local circumstances where necessary.

The NPPF includes the ability for local communities to further protect the most important community spaces with a Local Green Space designation via local and neighbourhood plans. Local Green Space designation is a way to provide special protection against development for green areas of particular importance to local communities.

The NPPF also states that existing open space, sports and recreational buildings and land, including playing fields, should not be built on unless:

- an assessment has been undertaken which has clearly shown the open space, buildings or land to be surplus to requirements; or
- the loss resulting from the proposed development would be replaced by equivalent or better provision in terms of quantity and quality in a suitable location; or
- the development is for alternative sports and recreational provision, the benefits of which clearly outweigh the loss of the current or former use.

In addition to national planning policy, there is an ever-increasing awareness of the importance of the population being healthy and active, to maintain and improve both physical and mental wellbeing, and providing well-kept, accessible open spaces can play a major role in this. Other national organisations have produced strategies that support these aims, for example:

- Public Health England: Everybody Active, Everyday (2014)
- Sport England: Towards an Active Nation (2016-2021)

The Environment Bill

The government introduced The Environment Bill in October 2019.

Under the Environment Bill, measures would be introduced to address environmental governance gaps following withdrawal from the EU and beyond. The Bill would put into legislation a series of environmental principles and establish an Office for Environmental Protection, which would have scrutiny, advice and enforcement functions. It would also make provision for the setting of long-term, legally binding environmental targets in four "priority areas" of air quality, water, biodiversity,

resource efficiency and waste reduction, along with the production of statutory Environmental Improvement Plans.

Following a commitment in the 25 Year Environment Plan (August 2018), the Government published a consultation on Biodiversity Net Gain in December 2018. This was followed by a commitment to apply a requirement for Biodiversity net gain of 10% for developers though the planning system. This gain will be measured using a biodiversity metric that has been developed by DEFRA.

The Environment Bill would legislate for the creation of the net gain requirement, expand the duty on relevant authorities from conserving to 'conserving and enhancing' biodiversity, and legislate for the creation of Local Nature Recovery Strategies to cover the whole of England.

Due to the calling of a General Election in late October 2019 and the resulting dissolution of parliament in early November, The Bill did not complete its passage through Parliament. Therefore, although the Bill will make no further progress until a new government is formed, it is important that strategies such as this one build in methods and targets that take the expected requirements into account.

The emerging Environment Bill plans to strengthen the current requirement placed on Local Authorities to 'have regard, so far as is consistent with the proper exercise of their functions, to the purpose of conserving biodiversity.' (the general biodiversity objective - Natural Environment and Rural Communities Act 2006).

Once the Bill is in place, the general biodiversity objective will most likely be strengthened to include the requirement to not only 'conserve' but 'enhance' biodiversity and Local Authorities will be required to 'consider what action can properly be taken, to further the general biodiversity objective'.

To this end Local Authorities will be required to 'determine such policies and specific objectives as it considers appropriate for taking action to further the general biodiversity objective, and take such action as it considers appropriate, in the light of those policies and objectives, to further that objective'.

Whilst the Gloucester Open Space Strategy promotes the conservation and enhancement of biodiversity as an important element of the authority's commitment to sustainability, it is also intended that this strategy should comply with the requirements of the Environmental Bill (in so far as they are currently understood).

To this end, the Open Space Strategy includes an informal assessment of the current biodiversity value of each of the authority's open spaces, and an estimate of the potential for enhancing the biodiversity value of each site. Where it is considered that there is the potential to achieve significant biodiversity gains, a more formal site assessment will be carried out (using the DEFRA biodiversity assessment metric), which will result in individual biodiversity enhancement plans being created and implemented.

This Strategy will be reviewed in light of any changes in legislation resulting from the passing into law of the Environment Bill in 2020 or beyond.

Local Policy

Along with the overarching national policies set out above, there are a number of locally adopted strategies and plans, many of which have aims and objectives that overlap those presented within this open space strategy. The cumulative impact of these inter-related documents serves to further emphasise the vital role that good-quality, accessible open space plays for both local communities and the natural environment within the city and beyond.

• Joint Core Strategy (JCS), adopted Dec 2017

- Co-ordinated strategic development plan that sets out how the Gloucester, Cheltenham and Tewkesbury area will develop up to 2031. Adopted in by all three councils in December 2017.

- Vision and policies include a commitment to build new developments to the highest standards of design, without increasing the risk of flooding, and focus on protecting the quality and distinctiveness of each community. Developments will be designed with respect for the natural and built environment and all residents and businesses will benefit from improved infrastructure, which includes roads, public transport and series and community facilities.

- Gloucester's natural environment will continue to be safeguarded and improved, particularly through the protection and enhancement of landscape features and key habitats within the City's boundary, such as Robinswood Hill and adjacent to it at Chosen Hill.

- Duty to co-operate, where open space serves a wider area.

- Sets out Community infrastructure Levy (CIL) requirements for Gloucester, a charge applied to most new residential buildings that will be used to help deliver infrastructure to support development (including open space improvements). CIL adopted from January 2019.

• Gloucester City Council – City Plan (2016-2031)

- City Plan delivers the JCS at a local level and also will set out policies that seek to address local issues and opportunities in the city.

- Identifies where and how new development will take plans to ensure it positively contributes to the City's needs.

- Strategic objectives include conserving and enhancing the environment, delivering excellent design in new developments, protecting and improving playing fields and open spaces, meeting the challenge of climate change and promoting healthy communities.

- Other policies include a 'Building with Nature' Standard, as well as tree and hedgerow protection.

• Gloucestershire 2050 vision

- 'Gloucestershire: A great place to live, work and do business, with a thriving future'. Key outcomes include:

- an inclusive county ensuring that the economic and social benefits are felt by all

- a prosperous county: rising productivity and household income, offering higher living standards

- a healthy, happy, and safe county: people have a good work/life balance and see improved health and wellbeing

- a sustainable county: more efficient use of resources and more use of sustainable energy

• Gloucestershire Health and Wellbeing Board

- The Board is responsible for overseeing the development and delivery of the *Joint Health and Wellbeing Strategy* - a 20-year strategy which aims to improve the lives of people in Gloucestershire. The principles that underpin the plan are:

- Supporting communities to take an active role in improving health
- Encouraging people to adopt healthy lifestyles to stop problems from developing
- Taking early action to tackle symptoms or risks
- Helping people to take more responsibility for their health
- Helping people to recover quickly from illness and return home to their normal lives
- Supporting individuals or communities where life expectancy is lower than the county average or where quality of life is poor.

- Joint Policy for Enabling Active Communities in Gloucestershire (2015) – action plan working to enable local communities to become more active, stronger and more sustainable, and in turn improve the health and wellbeing of local people.

- *GloW* – *Gloucestershire Wellbeing* - Gloucestershire health and wellbeing board's commitment for better mental health. Gloucester City Council is signed up to this county-wide initiative, which sets out what it takes to promote good mental health and wellbeing and help prevent mental illness.

• Gloucester City Council – Council Plan 2017-2020

- Focus on regeneration, housing, leisure and culture

- Core values include: Efficiency and value for money, forward thinking with innovation, making residents lives better, passionate about the city and working together to make it happen.

• Gloucester City Vision 2012-2022

- 'Gloucester will be a flourishing, modern and ambitious city, which all residents can enjoy'.
- Key aims include: A city which improves through regeneration and development, a city where people feel safe and happy in their community, a healthy city with opportunities for all.

• Gloucester's cultural vision and strategy 2016-2026

- 'Putting Culture at the Heart of Gloucester for the Good of All'

- Key objectives include: 'Broaden the cultural offer so as to support social and economic development, develop a vibrant city full of cultural things to do.'

• Gloucester City Council climate emergency declaration (July 2019)

Proposal to make the city carbon neutral (net zero carbon dioxide emissions) by 2050
City council to have a net-zero carbon footprint by 2030 and to find impacts of climate change when reviewing the council's strategies, policies and plans.

• Green infrastructure strategy (2014)

- Part of the JCS evidence base – providing a strategic development plan for the Gloucester, Cheltenham and Tewkesbury area up to 2031. Strategy is currently under review.

- Focus on connectivity and water.

- Vision that everyone should be able to access green infrastructure within 5 mins walk of home and use a series of interconnected, multifunctional green spaces to access the Cotswolds Area of Outstanding Natural Beauty (AONB) or the River Severn and its washlands.

Projected population growth

- The current city population (2017 census) is 129,083
- Estimated city population by 2024 is 137,200
- Estimated city population by 2041 is 151,100
- Gloucester has a faster growth rate of children and young people 0-19yrs (+6.8%), compared to the wider county (+2.1%) and England as a whole (+5.5%)

It is important that the development and management of the city's open space network has full regard for the expected future increases in population, including from development sites located just outside the city boundary.

Wherever possible, new green space provision will be secured within major housing developments or existing spaces will be provided with improved facilities to cater for additional users.

The following section sets out the anticipated new residential developments in Gloucester and criteria for any resulting open space provision.

New housing allocations in Gloucester

The JCS sets the number of new homes that will be required to meet Gloucester's needs until 2031. However, within the city, there are few sites left to accommodate large-scale housing development.

The list below sets out the remaining larger sites that have been allocated within the Gloucester City Plan (or already granted planning consent) for new housing and indicates the amount and type of open space that should be provided as part of each development.

Smaller developments would not have sufficient space to provide on-site open space, and in these cases off-site financial contributions to improve existing open spaces would be sought, through the S.106 or CIL process.

Location	Indicative housing capacity	Ward	Open space implications
Land at Winneycroft Farm (two sites)	600 units in total	Matson	 Formal play and sports facilities to be provided on site. Allotments to be provided on site.
Land at Great Western Rd sidings (to include improvements to Great Western Rd Rest Garden (E) open space)	200 units	Kingsholm and Wotton	 A LEAP play area or equivalent facility for children and young people to be provided on site. Off-site contribution for formal sport (and allotments) to be provided.
Land at St Oswald's Retail Park	300 units	Westgate	 A LEAP play area or equivalent facilities for children and young people should be provided on site. Connectivity to Westgate Park, including improved cycle access. Off-site contribution for formal sport (and allotments) to be provided.
Land at King's Quarter	156 units	Westgate	• Off-site contribution for formal play and sport to be provided.
Land at The Wheatridge (allocated as a school site, but with a fallback use as residential if no school use required)	-	Abbeydale	 A LEAP play area or equivalent facility for children and young people to be provided on site. Off-site contribution for formal sport to be provided.
Other small allocation sites, less than 50 units per site	Total up to 350 units	Various	 Sites over 35 units would normally be expected provide some on-site open space. Off-site contributions to upgrade existing nearby open spaces, including allotments, formal sport and play, to be provided.

The expected level of provision for new open spaces, sports facilities and play areas, as indicated in the table above, should be in accordance with the benchmark standards set out in the Fields in Trust 'Guidance for Outdoor Sport and Play: Beyond the Six Acre Standard, 2015' or any subsequent update. The City Council would expect any new open spaces to be a minimum 0.2ha in size and of a usable/practical shape (for example, long, narrow, linear strips of land would not generally be acceptable, unless they adjoin a larger space where informal recreation such as ball-games can take place).

The FiT guidance states that 'Quantity guidelines should not be interpreted as maximum levels of provision, and it is recommended that these are adjusted to take account of local circumstances.' The document also sets out accessibility guidelines, indicated as walking distance from dwellings and these should also be taken into account when proposing new open space facilities.

Section 7 of this document sets out in more detail the local considerations and limitations for the provision of new open space in Gloucester City.

New housing allocations adjoining the city boundary

There are a number of significant new or proposed housing developments that are located on the 'urban fringe', just outside of the Gloucester City administrative boundary. Residents living in these locations are likely to closely associate with Gloucester and will use the infrastructure within the city, including open spaces and sports facilities.

Some of these larger new developments will also provide their own open space, sports and play facilities on-site, which residents living within the city would be able to access.

The table below sets out the expected additional housing numbers. This housing growth, and the increased demand created on the city's outdoor sports facilities has been factored in to the adopted Playing Pitch Strategy and the likely impact will also need to be considered when developing or upgrading open space facilities located nearby. Funds for investment in these spaces may be available through the CIL process.

Already granted planning consent:						
Site	Number of					
	homes					
Longford	570					
(Tewkesbury Borough						
Council)						
Innsworth & Twigworth	2,295					
(Tewkesbury Borough						
Council)						
Hardwicke	300					
(Stroud District Council)						
Hunt's Grove	1,750					
(Stroud District Council)						
Churchdown	1,100					
(Tewkesbury Borough						
Council)						

Expected and potential housing numbers just outside city boundary:

Allocated sites or being promoted in JCS/local plan:						
Site	Expected number of homes					
N. Brockworth (Tewkesbury Borough Council)	Up to 1,500					
Hardwicke (Stroud District Council)	Up to 1,500					
Hunt's Grove (Stroud District Council)	Up to 750					
Whaddon (Stroud District Council)	Up to 2,400					

7. Open Space Standards

National Open Space Standards

There are no statutory open space standards for the quality, quantity and accessibility of open space provision, but for many years the benchmark for quantity has been the 'Six-Acre Standard' (aiming to provide six acres, or 2.4ha of open space per 1000 population), originally created by the National Playing Fields Association, now known as Fields in Trust (FiT).

The headline FiT standards were most recently updated in 2015, in the document '*Beyond the Six Acre Standard*', England edition but the more detailed 2008 document – '*Planning and Design for Outdoor Sport and Play*' remains a useful guidance tool. The guidance retains the same headline rates of provision, but draws out new recommendations for accessibility, for flexible application of standards and the minimum dimensions of formal outdoor space. This revision of the guidelines introduces benchmarking for informal open space - places for recreation, not involving organised sport and play - and includes parks and gardens, and natural and semi-natural habitats (based on Natural England's 'Nature Nearby' Accessible Greenspace Guidance, 2008).

It should be noted that when assessing quantity levels **for Parks and Gardens, Amenity Greenspace and Natural/Semi-natural Greenspace**, FiT state that their 'Quantity guidelines are provided as minimum guidelines and should not be interpreted as maximum levels of provision; and it is recommended that they are adjusted to take account of local circumstances.'

In the case of **Playing Pitches, other Outdoor Sports, Equipped Play Areas and MUGAs/skate ramps** etc, FiT guidance states: 'Quantity guidelines should not be interpreted as either a maximum or minimum level of provision; rather they are benchmark standards that can be adjusted to take account of local circumstances.'

Methods for assessing and setting targets for **Formal Outdoor Sports Pitch Provision** have been undertaken using Sport England's Playing Pitch Strategy Guidance (2013). Gloucester's Playing Pitch Strategy is a fully detailed study of the city's sports provision and future needs, and sits alongside this document, which does not go into any additional detail in relation to sports provision. The city's Draft Built Facilities Strategy (2019) which assesses indoor sports provision, will provide further insight into Gloucester's current and future needs and aspirations.

Allotment provision (quantity) is based on a standard recommended by the National Association of Allotment and Leisure Gardeners (NSALG).

There are no quantity standards set for Cemeteries or Civic Spaces.

In terms of quality standards, the principle provider of parks quality assessment in the UK is the Green Flag Award. However, this approach is really only relevant to the best quality parks and open spaces, which provide an 'above standard' facility and is not appropriate for assessing every open space typologies. Therefore, although the aspiration is to achieve a Green Flag 'pass' standard for the city's principal and best-kept spaces, a simpler rating system, as set out in Appendix 2, has been used to assess the majority of spaces, to give a general indication of each site's quality and community value, as well as the existing and potential biodiversity value. The assessment is intended to reflect local circumstances and includes information on open space distribution and indices of deprivation for each site's location within the city.

8. Open Space assessment and analysis

For the purposes of this strategy, 'Open Space' is taken to mean all open space of public value, including not just land, but also bodies of water such as rivers, canals, lakes and reservoirs which offer important opportunities for sport and outdoor recreation and can also act as an ecological and visual amenity.

It should be noted that in accordance with best practice recommendations, generally only green spaces of 0.2 hectares or larger have been audited. However, some smaller spaces have been included, where these fall just below 0.2ha or it is felt that they are of particular value to the city or local community and are often in locations where open space provision is limited.

There are a broad range of open spaces of public value and these can generally be broken down into different typologies. Larger open spaces can have multiple functions and some, such as allotments, are more use specific. However, even a specific 'use', such as a cemetery, can also have high value for wildlife and natural habitat, so in many cases there can be multiple typologies within one space.

The breakdown of each open space, set out at Appendix 1, identifies the primary typology and any other notable typologies within the space (e.g. sports ground with play area and natural green space around boundaries). It is intended to give a general overview, so is not fully exhaustive and other small areas of different typologies are probably present in many spaces.

Other open space functions have been taken into consideration, but not specifically identified quantified. These are:

- **Strategic functions** defining and separating urban areas, providing community greenways, 'green lungs' or landscape buffers within urban areas.
- **Urban quality** helping to support regeneration and improving quality of life by providing visually attractive green spaces close to where people live.
- **Promoting health and well-being** providing opportunities to people of all ages for informal recreation, to walk, cycle or ride within parks and open space, or along paths, bridleways, river and canal banks. Allotments also provide physical exercise and other health benefits.
- Havens and habitats for flora and fauna sites may also have potential to be corridors or stepping-stones from one habitat to another and may contribute towards achieving local biodiversity objectives.
- As a community resource a place for congregating and holding community events.
- As a visual amenity even without public access, people enjoy having open space near to them, to provide an outlook, variety in the urban form, or as a positive element in the landscape.

Due to the built-up nature of Gloucester, with few remaining major development opportunities, it is unlikely that any significant increase in provision will be achieved in the future.

Therefore, it is important to concentrate instead on achievable targets, the retention of all existing parks and gardens, enhancement of the quality of park facilities and maintenance, as well as improving site accessibility wherever possible. Ensuring that any open spaces within new developments just outside the city boundary are functionally connected, to benefit both existing and new communities across the boundary will also be imperative.

Open Space Typologies

The eight standard open space typologies used in this document are defined as follows:

• Parks and Gardens

Accessible, high quality spaces with opportunities for formal and informal recreation, including community events.

• Amenity Green Space

Open space areas with opportunities for informal activities close to home or work, or enhancement of the appearance of residential or other areas.

Natural and Semi-natural Green Space

Areas managed primarily for wildlife conservation, biodiversity, environmental education and awareness. Can include river/canal and other green corridors, balancing ponds, urban woodland and other green infrastructure.

• Formal Sport (outdoor)

Areas for participation in outdoor sport, such as pitch sports, tennis, bowls, athletics or countryside and water sports.

• Children's play and facilities for Young People (including formal equipped play areas)

Areas designated primarily for play and social interaction involving children and young people, such as equipped play areas, ball courts (MUGAs), skateboard areas, BMX tracks and youth shelters.

Cemeteries

Spaces for quiet contemplation and which are often linked to the promotion of wildlife conservation and biodiversity. Includes disused churchyards and burial grounds.

Allotments

Areas for people to grow produce as part of the long-term promotion of sustainability, health and social inclusion. Includes community gardens and urban farms.

• Civic Spaces

Areas providing a setting for civic buildings or monuments, community events and activities. Includes market squares and hard surfaced areas.

Local open space standards - Quantity

The modern City of Gloucester has developed organically over hundreds of years and as a result there will have been periods, when there was an urgent demand for new housing, that providing new open spaces, sports and play facilities may not have been a priority. Many of the densely built areas of the city also pre-date modern open space planning guidance and could not be expected to meet the currently recommended levels.

As a result, there are parts of the city that are much better served with open space provision than others. It is not possible to easily redress the imbalance at this point in time, as most of the city's land area has now been developed or allocated to other uses.

However, the city is also situated within a wider landscape of open countryside, with opportunities available just outside the city for recreation and enjoyment using country parks, public rights of way and other accessible green spaces. Easy access to the canal, Gloucester Docks, Quays and to long distance footpaths such as the Severn Way provide an additional resource for residents.

These factors are part of the local considerations that have been taken into account when setting out the proposed open space recommendations for Gloucester City, an approach supported by national guidance.

There are currently a total of **552.71** hectares of open space in Gloucester, across over 200 individual spaces, which equates to an overall provision of **4.28ha** of open space per 1000 population.

The detailed breakdown by typology (see table below) shows that over half of this provision comes from natural and semi-natural green spaces, including the very large sites at Robinswood Hill Country Park and Alney Island Nature Reserve.

Other types of open space, such as formal play/youth facilities are underserved within the city, but most of these are set within larger open spaces, so children and young people should be able to utilise the additional surrounding green space for informal recreation activities. However, if an opportunity arises to increase the size of a dedicated play area or youth facility, this should be taken whenever possible.

It should be noted that there are several city-centre areas that have not been included in the general open space calculations – these are located at the Gloucester Cathedral precincts, Gloucester Docks and Gloucester Quays. These spaces play a key role in providing a civic setting to some of the city's most important buildings and are used by residents and visitors throughout the year, including events, activities, processions and festivals. The Gloucester-Sharpness Canal corridor and towpath has also not been included in the overall calculations, but this resource provides further informal recreation opportunities, including water sports.

There are a number of privately-owned open spaces, such as school playing fields or private sports grounds, which are also accessible to the wider community, through shared-use community agreements, formal or informal arrangements. These are an important part of the city's open space network but are not included in any of the open space calculations.

In order to ensure that funds are focused on land owned by the council, land which has not been adopted by, or transferred to, the council will not be maintained at public expense. In cases where the council becomes aware of areas of incidental open space resulting from development, not in public ownership, we will seek to contact the owner to ask them to take responsibility for its maintenance.

Typology	Current quantity of provision (Hectares)	Current ratio of provision in Gloucester City (ha per 1000 population)	National guidance benchmark standard (ha/1000)
Parks and gardens	54.64	0.42	0.80 (FiT, 2015)
Natural and semi- natural green space	278.56	2.16	1.8 (FiT, 2015)
Amenity greenspace	69.83	0.54	0.6 (FiT, 2015)
Formal sport (outdoor) (refer to Playing Pitch Strategy for detailed study)	96.29	0.75	1.6 (inc 1.2 playing pitches) (FiT, 2015)
Formal play/youth facilities	7.39	0.06	0.25 (play) (plus 0.3 - youth facilities) (FiT, 2015)
Allotments	14.58	0.11	0.25 (NSALG)
Cemeteries	27.80	-	n/a
Civic spaces	3.62	-	n/a
Total	552.71	4.28	

Breakdown of Gloucester's open space provision by typology

FiT = Fields in Trust Beyond the Six Acre Standard, Guidance for Outdoor Sport and Play (England) October 2015, ANGSt = Natural England, Access to Natural Green Space Standard, 2008, NSALG = National Society of Allotment and Leisure Gardeners.

Opportunities for new open space provision

Section 6 sets out the remaining housing development sites and allocations within the city, most of which will not be able to provide substantial on-site open space provision due to the development sites being too small to practically accommodate open space and facilities of at least the required minimum 0.2ha in size. It is therefore unlikely that the national benchmark standard will be achievable for the underserved typologies, but should opportunities come forward, open space should be provided at a quantity in line with the current national guidance (Fields in Trust).

It should also be clearly noted that where there are levels of provision that exceed the national minimum or benchmark standard, this does not mean that there is surplus provision, and all such provision is likely to be well-used. Similarly, typologies cannot simply be interchanged, to create more space of another type. This would need very careful consideration and consultation.

The quantity standards set out reflect only the importance relating to a list of given recreational activities or uses. The value of most open space is far greater than any individual typology 'label' assigned to it and will hold additional intrinsic value for many other reasons, including ecological and visual value. The full value of all open space must always therefore be viewed in the context of broader environmental and planning considerations.

Where new development is not able to provide on-site open space, including allotments, then provision should be made for an off-site financial contribution. This may be via the CIL or S.106 process, depending on the site. To calculate the level of contribution, an itemised estimate based on the current cost of each type of facility should be provided by the developer. If relevant, the Sport England Sports Facility calculator should be used to determine the expected demand and level of provision required.

As a general guide, sites of 35+ housing units should provide the equivalent of a LEAP play area and formal sports facilities. Developments of 100 units or more should provide the equivalent of a NEAP play area (including a MUGA or similar) as well as formal sports provision. Sites smaller than 35 units would make a general payment to improve existing local open space facilities nearby (via CIL or S106 as appropriate. S.106 provision must align to opportunities identified in this strategy).

Local open space standards - Quality

The majority of existing open spaces across the city are managed by Gloucester City Council. However, there are a few exceptions to this – there are a number of sites in the Quedgeley and Kingsway area which are managed by Quedgeley Town Council (the only formal parish council within the city boundary). Parishes are able to charge a precept to fund the council and activities they undertake on behalf of the community; the precept is an additional charge to all residents located in the parish boundary and is collected via the Gloucester City council tax.

There are also a small (and growing) number of public open space sites in Gloucester that are maintained by a management company on behalf of a private landowner (often a housebuilding company). This is where the landowner chooses not to ask the council to formally adopt and maintain the open spaces in perpetuity but instead retains legal ownership. Generally, a service charge is paid by every property on the development to look after the green spaces (and sometimes roads and other amenities).

Any open spaces not maintained by the city council should be clearly signed, with a contact address, phone number or email, to allow residents to report any issues to the owner.

The city council would expect these privately managed open spaces to be maintained at least to the same standard as the council's green spaces.

Because there are some areas of the city where the quantity of open space is limited, and there is little likelihood of an increase, it is more important than ever that the quality of the open spaces that are available to residents in these areas is as good as it can be. Recent studies have shown that providing good quality, well-maintained open spaces and facilities attracts a larger number of regular and returning users. The quality of an open space is usually valued by visitors above the quantity or accessibility and there is much good practice guidance to support this.

The National Planning Policy Framework (NPPF) advocates for '*high-quality open spaces and opportunities for sport and recreation*', as does the Fields in Trust (FiT) open space guidance. It is also recommended that local considerations are included when assessing sites for quality, to allow adjustments to be made for the particular circumstances in each strategy area.

The Green Flag Award scheme represents the only recognised national standard for assessing the quality of parks and open spaces across the UK. Only the best, most well-managed sites will be able

to achieve the standard. Gloucester currently has three Green Flag spaces, an increase from one in 2015.

However, assessing all open spaces/typologies against the detailed Green Flag criteria, which are designed to measure an exceptionally high standard of site, would not be appropriate for the majority of the city's green space areas. For the purpose of this strategy therefore, and in line with guidance, a locally set site quality assessment has been undertaken for each area of open space. High/Med/Low scores are given against a basic expected level of quality/maintenance, potential for biodiversity and community value.

The assessment results are set out in Appendix 2 and provide a comparative overview of the current quality of all spaces in the city. Additional local factors, such as how many similar spaces there are nearby and the level of IMD (Indices of Multiple Deprivation – National Quintile) for the site location are included and considered, so as to ensure that a general picture of each site and its value to the community within the local setting can be assessed.

A short analysis of the site assessments is set out below, which identifies the number of sites that fall below the expected standard.

Site Quality Assessment - summary

Low Quality – site falls short of expected standard and requires some improvement. Medium Quality – Site is in fair to good condition but may benefit from further improvement. High Quality – Site and facilities are of good quality and are generally well-managed.

- 20% of open spaces in Gloucester were assessed as Low Quality
 - 71% of open spaces were assessed as Medium Quality
 - 9% of open spaces were assessed as High Quality

Children's play areas have been assessed separately, using the Play England Play Assessment Tool. The overview and analysis for play areas can be viewed at Appendix 4.

Local open space standards - Accessibility

Accessibility is the way that people get to open spaces, whether on foot, cycling or by car. Accessibility guidelines set out acceptable distances that people can be expected to walk from home to access their nearest types of open space. FiT recommend that local factors and obstacles to pedestrian and cycle movement should be taken into account. Ideally, open spaces and play facilities should also be accessible from bus routes.

As previously outlined, open space provision across Gloucester is not evenly and consistently spread. Some parts of the city have more limited areas of open space, and there is very little chance of increasing provision in densely built up neighbourhoods. In these areas, it is important that the open spaces available to residents are clearly signposted and access routes made as user friendly as possible, to encourage a slightly longer travel-to-play time where necessary.

The table below sets out Gloucester's recommended accessibility standards for each type of open space. These are based on local factors, including barriers to access where there are limited crossing points, such as main roads, railway lines, the river and canal.

Open Space Typology	Gloucester City walking distance metres from dwelling	National benchmark guidance (walking distance)	Notes
	(1.2mins per 100m = 5kph)	FiT/ANGSt/NSALG	
Parks and	800m	710m	Accessibility to parks, gardens

Recommended local accessibility standards for Gloucester:

Overall, the city has a good level of accessibility for the majority of residents to parks, gardens and larger areas of amenity greenspace. Many of Gloucester's large amenity spaces

provide similar functions to a park (the exact distinction between a park and amenity greenspace is not easily defined).

When mapped, there are just a few areas of residential development where accessibility to a park or large amenity space is not possible within the stated walking distances. These are the NW corner of Hucclecote ward, parts of central Longlevens, the SE corner of Grange ward as well as a central block through Quedgeley Severnvale and Quedgeley Fieldcourt wards (west of the A38).

Natural and Semi-natural green space is quite accessible in all parts of the city, with many smaller local spaces distributed across the city (as well as the canal and River Severn corridors). Larger sites, at Alney Island Nature Reserve and Robinswood Hill Country Park, which are managed by the City Council's Countryside Unit, are accessible to all residents (within 5km). The Gloucester-Sharpness Canal corridor (and to a lesser degree the River Severn) also provide good accessibility to natural greenspace in the west and south west of the city. Gloucester is located on the edge of the Cotswolds AONB and residents are able to access other larger natural spaces just beyond the city, such as the Cotswold Commons and Beechwoods SSSI (690ha), which is within 10km.

Formal play spaces and youth facilities (skateparks/MUGAs) are not distributed evenly across the city. Whilst some wards have a good choice of LEAPs (play area) within walking distance, there are parts of Elmbridge, Longlevens, Hucclecote, Abbeydale, Matson & Robinswood, Kingsholm & Wotton, Tuffley and Quedgeley where a play area is well over 5 mins walk away.

Similarly, the distribution of NEAPs (larger play areas that include a youth facility such as a MUGA, skatepark or similar) leaves some parts of Elmbridge, Barnwood, Hucclecote, Kingsholm & Wotton Matson & Robinswood, Quedgeley with poor coverage.

Although there are few opportunities to increase provision in all of these areas, a new play area with small MUGA is currently being built at Ayland Gardens (Barton & Tredworth ward) and new play areas are planned (funding secured via S.106) at Hucclecote Playing Field (Hucclecote ward), Plock Court (Longlevens ward), Clearwater Drive (Quedgeley Severnvale ward), Fieldcourt Drive (Quedgeley Fieldcourt ward) and Lasborough Drive (Grange ward). There will also be new play areas incorporated by developers into housing schemes at Bristol Rd (Podsmead ward) and Grange Road (Tuffley ward). A new play area at Westgate Park would be of benefit - to provide improved coverage for residents in the NW of the city.

Some of the city's larger spaces with a good range of facilities (e.g. Robinswood Hill Country Park, Gloucester Park) draw visitors from a much wider catchment, often arriving by car, cycle or bus, as many people are prepared to travel a little further and spend longer there.

Local open space standards – Biodiversity

The city has a wide range of green spaces, managed in different ways depending on the use of the space. Historically, many green areas were kept regularly mown, with short grass providing minimal habitat value. However, in recent years there has been an increased effort to improve the natural habitat value of the city's green spaces wherever possible, without directly impacting on other functions such as formal sport or drainage infrastructure. For example, many of the city's areas of close-mown amenity grass could be re-assigned to develop a much more diverse wildflower sward, or planted with trees, which would provide substantial benefits to wildlife.

The site assessments undertake for this strategy include a simple baseline assessment of the existing biodiversity value of each site and indicating the spaces where biodiversity improvements could be undertaken to improve this value.

Where it is considered that there is the potential to achieve significant biodiversity gains a more formal site assessment will be carried out, using the DEFRA biodiversity assessment metric, which provides a way of measuring and accounting for biodiversity losses and gains. Individual Biodiversity Enhancement Plans will then be created and implemented for those sites.

Where sites already have high biodiversity value, measures to protect and further improve them will be taken.

Many of the city's green spaces also have a dual function as part of the wider Green Infrastructure (GI) network, often containing watercourses or areas with sustainable drainage systems (SUDS) built-in to the landscape, which manage surface water runoff during heavy rainfall events. The council has produced both a Green Infrastructure Strategy and a SUDS Strategy, which set out the aims and objectives for these areas. These documents will be reviewed and updated as necessary. The GI/SUDS sites are often rich in existing biodiversity or have good habitat potential and the council will ensure that their management protects and enhances the natural habitat and associated wildlife wherever possible.

Local open space standards – Community Value

The benefits of open spaces. Local green spaces are often a hub for local communities. They are free to access, can be used for a range of activities and provide space and tranquility in an often busy and complicated world. Some communities have additional challenges – perhaps being very densely populated or within a socially deprived ward. In these places green space can be even more important, providing access to nature, clean air and enhanced recreational opportunities.

Even some of our smallest spaces help to shape local identity, helping people to overcome social isolation and creating a sense of belonging. Parks also offer people from all walks of life and all parts of our society somewhere to come together, enjoy each other's company and take advantage of the opportunities that accessible, free and attractive open spaces can provide.

Whilst all open space has positive intrinsic and quantitative value, there are some spaces within the city which are especially highly valued by the local community. These spaces have additional value in this respect and should be prioritised for enhanced investment, community involvement in their management and future improvement where possible.

A summary and analysis of the Community Value Assessments for each open space is set out in Appendix 3.

9. Working with partners and the community

The council manages and improves the city's open spaces with input and assistance from a wide range of voluntary, public and private sector partners. Some act in an advisory role, others actively manage the spaces, provide specialist services, perform community liaison or help with raising funds for specific projects.

Partnership working brings significant benefits and integrating open space improvements with wider community-led neighbourhood programmes can often bring better outcomes.

The council is committed to further developing partnerships and community projects in parks and open spaces. Examples of recent community-led, externally funded projects are the new play areas at Tuffley Park (funded via Podsmead Big Local) and Armscroft Park (funded via Friends of Elmbridge).

Gloucestershire Wildlife Trust is also working in the city, to help bring improvements to urban wild habitats and encourage residents to explore and learn about Gloucester's wild places. Initiatives to date include All Paths Lead to the Hill, Wild Kingsway and the Milton Avenue Green Space project.

Examples of local partners (some provide or manage their own public spaces; others work within the council's spaces):

- 'Friends' groups, e.g. Friends of Barnwood Arboretum, Friends of Hillfield Gardens
- Community groups, sports clubs and teams
- Gloucestershire Wildlife Trust
- University of Gloucestershire
- Aspire Sports and Cultural Trust
- Active Gloucestershire
- Quedgeley Town Council
- Amey (grounds maintenance partner)
- Gloucester Quays/Docks Management Company
- Diocese of Gloucester
- Canal and River Trust/Environment Agency/Internal Drainage Board
- Community payback/probation service
- Other charity organisations, e.g. Play Gloucestershire, Get Up and Go Gloucester
- Gloucester Civic Trust
- Gloucester City Homes
- Gloucestershire County Council

The council is very fortunate to have many dedicated and committed volunteers and Friends groups working across the city. These groups hold volunteer work days, fund-raising events, undertake site management, cleaning and litter picking. Many volunteers also dedicate long hours to carry out enhanced grounds maintenance for sports pitches and manage clubhouses and pavilions located on open spaces.

The council will continue to support and encourage the formation of local Friends groups and community-led maintenance and management of open spaces across the city. Tenure agreements for sports facilities and pitches can be negotiated with the council's Asset Management Team.

10. Funding

Local authorities are facing ongoing restrictions on spending, which is unlikely to change for the foreseeable future and there is an inevitable impact on the council's ability to provide and maintain its wide range of services and facilities.

The city council has innovated and looked at best practice wherever possible, to deliver revenue savings and efficiencies without impacting on provision. For parks and open spaces, priorities are sustainability in the medium to long term, adapting sites to take account of climate change, reducing waste and streamlining maintenance services.

Capital spending can be sourced from a variety of providers. Since 2001, the council has successfully negotiated 'Section 106' funds from housing developers, through planning applications, which have been ringfenced to improve public open space, allotments, sport and play facilities. Although the S.106 process has now changed (becoming the Community Infrastructure Levy (CIL), adopted by the council in Jan 2019), there are still some residual S.106 funds to be put towards open space projects in the city. Any new housing developments will be required to calculate appropriate on-site open space provision or apply the CIL process to provide a financial contribution that can be used to upgrade existing sites nearby.

The council, as well as local community groups and organisations, will seek to source other capital funding for open space projects through external grant-providers and partnership working wherever possible.

Grounds maintenance

The Council's current contract with Amey PLC for the provision of grounds maintenance services, comes to an end in April 2022. At present no decision has been taken with regard to the future provision of these services, but the authority is currently considering a range of options.

Any requirements in respect of grounds maintenance provision resulting from this strategy will be considered in the development of any future grounds maintenance specification.

11. Monitoring and review

The aims and objectives set out in this strategy will be regularly reviewed and an annual monitoring report on progress will be produced and presented to the Council Cabinet after the end of each financial year.

12. Appendices

Further details of the assessment, analysis and breakdown o the open spaces within the city are set out in the following appendices.

- Appendix 1 Ward Maps and breakdown of open space by quantity & type
- Appendix 2 Summary of Open Space Site Quality and Biodiversity Value Assessments
- Appendix 3 Summary and Analysis of Community Value Assessments
- Appendix 4 Summary and analysis of Play Area Assessments

APPENDIX 1

Breakdown of open space quantity by ward

Overview

A local audit of open spaces in the city was undertaken, to provide an understanding of the current amount, location and condition of each type (see page 15 for a breakdown of the open space typologies).

Totals	Parks and Gardens	Amenity open spaces	Natural/semi- natural	Formal	Formal play/youth sport	Cemetery	Allotment	Civic	Total

Westgate ward (northern section)

Westgate ward (southern section)

Privately owned open space

The city council does not own or manage all green spaces in the city. Those classed as 'private' open space are identified in the table below. Although privately owned, many of these facilities provide formal and informal recreational opportunities for residents and local communities. Even if they are not directly accessible, the space are valued for their visual amenity and create additional 'green lungs' within the urban fabric of the city. Planning policies in the Gloucester City Plan and the Joint Core Strategy provide protection against the loss of playing fields and promotes design for shared (community) use for new sports facilities in schools and colleges.

There are a number of shared use facilities available to residents in local secondary schools across the city. Access to these facilities, particularly sports pitches, is an important part of the city's open space network, and the council will continue to liaise with the schools and education authority to ensure this provision is sustained. Most primary schools do not have shared community use of their playing fields, although there are one or two exceptions in the city.

There are other private playing fields and associated facilities, owned by companies or organisations that also share their use with the public (or via a club membership). Loss of such playing fields can have a significant impact on residents' options for accessing formal sports facilities. Planning policies are in place to ensure that these spaces are protected from development wherever possible, but should development be given the go ahead, as part of the planning process, the policies enable the council to negotiate with the developer to provide equivalent alternative facilities, to replace those being lost.

There are several sites across the city where areas of undeveloped private land are used informally as open space, although there is no formal, legal right of access. Many residents see these undeveloped sites as integral part of the open space network, however, most of these sites are now proposed for residential or other development. The council will seek to secure formal open space provision within new residential developments on these sites wherever possible, but development of the site would not constitute a formal loss of POS.

Site name and ward	Size	Description
	(indicative)

		currently used as informal open space.
Barnwood Ward	-	
Wall's Club playing field,	3.64ha	Football pitches, some community use
Hammond Way		
British Energy site,	0.31ha	Sports facilities used by employees –
Barnett Way		tennis/bowls
Barnwood Park Arts College,	1.5ha	Cricket pitch, shared use
St Lawrence Road		

Privately owned and other accessible open spaces

Site name and ward	Size (indicative)	Description
Barton & Tredworth Ward	(
The Glebe (rear of Kingfisher church),	0.56ha	Some use by groups - by agreement with
Moor St.		owner (county council).
MUGA Widden School,	0.09ha	Hard surfaced sports court, currently
Sinope Street		with limited or no public use
Conduit St Community Garden,	0.03ha	Currently not open to the public.
Conduit Street		
St James City Farm, Albany Street	-	Urban farm, open to the public
(generally accessible to the		(land currently leased, but is owned by
public during the day. This site		the city council)
has been included in the general		
open space calculation for St		
James Park.)		
Coney Hill Ward		
Friendship Cafe MUGA, Chequers	0.06ha	Currently no regular public access, but
Bridge, Barton Street		within grounds of community facility
Coney Hill (Echoes) MUGA	0.1ha	Community use
Druid's Close		
Elmbridge Ward		
Sir Thomas Rich's School,	4.0ha	Shared use sports facilities
Oakleaze	0.001	Rugby/football/cricket
Sisson Rd bowling club	0.22ha	Bowling green (membership)
Elmscroft Community Centre,	-	Community facility with small outdoor
Coronation Grove		garden space
Green Pippin Close central green	0.05ha	Small, informal space
space		
Grange Ward	0.241	
Beaufort Co-operative Academy,	0.24 ha	Playing fields and shared use MUGA
Windsor Drive	(MUGA)	
Kingsholm & Wotton Ward		Sharod use grass pitches (rughy
High School for Girls, Lansdown Rd	-	Shared use grass pitches (rugby – Spartans RFC), tennis courts with no
		shared use currently.
Wetter Terris Club	0.5460	-
Wotton Tennis Club	0.54ha	Tennis courts (membership)
Kingsholm Square	0.15ha	Private garden for residents
		(2 x grass tennis courts)

Site name and ward	Size (indicative)	Description
Longlevens Ward		
Longlevens Infant School	0.9ha	Shared use for weekend junior football
GALA club	1.42ha	Members use, football pitch
Land off Leven Close	-	County council owned land, with planning consent for future development, which will include small playing field POS area. Currently
		unavailable for recreation.
Land at Bishop's College, Estcourt Close (not included in open space calculations)	-	Currently being redeveloped for housing, A playing field will be provided as POS on completion of the development.
Matson & Robinswood Ward	1	· · ·
Gloucester Academy, Painswick Road	-	Some shared use pitches/facilities
Old Centralians ground, Painswick Road	0.9ha	Rugby pitches (some shared use, linked with Gloucester Academy?)
Matson Shops island Matson Avenue	0.23ha	Highway or housing land, in public use, informal green space
Gloucester Golf Club,		Golf - not included in FiT sports pitch
Matson Lane		designation
Gloucester Ski and Snowboard Centre, Matson Lane	-	Not included in FiT sports pitch designation
Moreland Ward		-
Ribston Hall School <i>,</i> Calton Road	1.4ha	Some shared use, grass football pitches
Podsmead Ward	1	
Crypt School, Podsmead Road	1.6ha	Some shared use - cricket & rugby
Old Cryptians/Memorial Ground, Tuffley Avenue	4.6ha	Rugby pitches, used by two clubs
Winget bowls club, Tuffley Avenue	0.18ha	Bowling green (membership)
Tuffley Rovers FC	2.07ha	Football pitch (club use)
Quedgeley Severnvale Ward	2.07110	
Clearwater Drive reserved site, Clearwater Drive	2.15ha	Formerly an area of informal green space, permitted public use, now with planning consent for primary school
Gloucester & Sharpness Canal and towpath (towpath is located in both Westgate and Quedgeley Severnvale wards)	-	Extensive linear footpath and green corridor with permitted public access, rowing, fishing, cycling etc.

Site name and ward	Size (indicative)	Description
Quedgeley Fieldcourt Ward		
Woolstrop Moat	0.5ha	Currently no public use (scheduled monument)
Severnvale School	0.6ha	Some shared use for sports teams (synthetic pitch, tennis)
Tuffley Ward	1	1
St Peters High School,	1.57ha	Shared use synthetic and rugby pitch
Stroud Road		
Westgate Ward	1	1
Gloucester Cathedral grounds,	-	Informal recreation/gardens with public
College Court		access
Severn Trent nature reserve	-	Wildlife reserve, no formal public access
(Netheridge WTW), off Rea Lane		
Netheridge Farm (Barn Owl	-	Access via entry to centre or informal
Centre), off Secunda Way		access via public footpath network
Hempsted Meadows,	-	Informal access via public footpath
off Secunda Way		network
Sudmeadow Landfill site (some	-	Informal access via public footpath
parts still active), Hempsted Lane		network
Gordon League RFC	3.90ha	Rugby pitches, club use
Hempsted Lane		
Brunswick Square	0.44ha	Private garden, informal public access allowed
Town Ham field	1.2ha	Owned by city council, but not currently
(ex. Allotments)		in use due to condition of land
St Michael's Square garden, Brunswick Road	0.08ha	Informal public access
Gloucester Docks and Gloucester Quays/Peel Centre	-	Docks open spaces and quayside paths, public access permitted
Port Ham/Castlemeads,	-	Canal and River Trust land, informal
off Castlemeads Way		public access on local footpaths
Llanthony Lock (Gloucestershire	-	Informal public access permitted on local
and Herefordshire Canal Trust)		footpath network
Riverside Leisure Centre,	0.23ha	Outdoor tennis courts for members use
Westgate Street		
Gloucester and Sharpness Canal	_	Canal and River Trust land, informal
and towpath (towpath is located in both Westgate and Quedgeley Severnvale wards)		public access permitted

APPENDIX 2 Open Space – Site Quality and Value Assessments

Assessing site quality and value

All open space is inherently of value and there is unlikely to be a scenario where it is considered appropriate to dispose of any large areas of open space in Gloucester. Even if a development proposal were to meet one or more of the exemptions required as part of the formal town planning process (refer to City Plan/JCS), new open space of equivalent or better quality and value would be expected to be provided in place of any lost.

However, undertaking a baseline assessment of the quality and value of the city's open spaces allows the council to identify the sites which are currently most used and valued by the community (within the individual circumstances of the local context for each site), those with the greatest potential for improvement and those that require additional investment as a priority. In addition to the site quality and community value the existing and potential biodiversity value for each site has been considered. This enables priorities to be set for protecting or improving the quality of the natural habitat within green spaces across the city.

The sites have been assessed as LOW, MEDUM or HIGH against three main criteria:

- Site quality
- Community Value
- Current and Potential Biodiversity Value

In line with good practice guidance, consideration has been given to the local context of each site when scoring each space. For example, additional factors such as general scarcity of open space in the locality, the prevalence (or shortage) of each type of space and the IMD (Indices of Multiple Deprivation) rating for each ward have been taken into account.

Summary of Site Quality and Value Assessments

	PO3 - Scott Avenue	med	
	PO5 - Milton Avenue play area	med	
	PO7 - Blackbridge Athletics Track	high	
Westgate	WE7 - Gloucester Park	med	
	WE15 - King's Square	med	

(2) Sites with low community value + High IMD

Whenever possible, these sites should be prioritised for improvement, investment or consideration given to possible disposal (subject to planning requirements and including options for new alternative uses), with full community consultation.

Ward	Site	Site quality
Coney Hill	Savernake Road	low
Kingsholm & Wotton	Great Western Road rest garden (London Rd)	low
Matson & Robinswood	Saintbridge Recreation Ground	low
Moreland	Sydenham Gardens	low
Podsmead	Byron Avenue	med
Westgate	Jubilee Gardens	low
	Priory Rd rest garden	med

(3) Sites of high community value + medium scarcity (several/some) + high IMD

These sites would benefit from some improvement as soon as possible, to update existing facilities or provide new features, with full community consultation.

Ward	Site	Site quality
Abbeydale	AD10 – Heron Way Open Space	med
	(nb: one side of the brook is HIGH IMD, one side is LOW IMD)	
Coney Hill	CH3 – Coney Hill Park	low

(4) Sites of med community value + high scarcity (few/very few/none) + high IMD

These sites would benefit from some improvement as soon as possible, to update existing facilities or provide new features, with full community consultation.

Ward	Site	Site quality		
Barton & Tredworth	BT1 - Ayland Gardens/Bishopstone Road	low		
	BT4 - Diamond Jubilee Close	med		
Kingsholm & Wotton	KW1 – Dean's Way Meadow			
Moreland	MO7 – Parry Field med			
Westgate	WE1 – Westgate Park	med		
	WE3 - St Oswald's Priory	med		
	WE6 – Greyfriars (St Mary de Crypt churchyard)	med		
	WE18 – St Oswald's Park (Longhorn Avenue sites)	med		

(5) Sites of low quality + high community value

These sites would additionally benefit from some improvement, to update existing facilities, create better management regimes, or provide new features. Full community consultation should accompany an proposed changes.

Ward	Site	notes		
Barton &	BT3 - St James	Overall improvements to all facilities and		
Tredworth	Park	management would be desirable. Upgrade of small		
		MUGA would be of benefit.		
Coney Hill	CH3 – Coney Hill	Overall improvements to all facilities and		
	Park	management would be desirable. Upgrade of small MUGA would be of benefit.		
Grange	GR5 – Holmleigh	Overall improvements to all facilities and		
	Park	management would be desirable. Play area in		
		particular needs overall updating. Provision of a		
		MUGA facility would be of benefit.		
Matson &	MR5 – Matson	This site is a 'hidden gem' with excellent mature		
Robinswood	Park	trees, lake/stream, play features, SUDS, pitch, but		
		worn-out paths etc. The site requires a well-		
		thought out management plan, and investment in		
		the infrastructure to help provide great facilities		
		for residents, whilst preserving and enhancing the natural habitat.		
	MDC Destant Dd			
	MR6 – Rectory Rd	A fenced, underused but highly valuable green space. Would benefit from removal of dated		
	Gardens	flower beds and provision of new facilities such as		
		outdoor fitness hub, play features, food-growing		
		spaces, new paths, seating etc.		
	MR14 – Northfield	Very small green space with hedges/shrubs		
	Rd	around edges. Would benefit from new tree		
	Ru	planting. Residents views crucial for any changes.		
	MR17 – Bibury Rd	A valuable small kickabout space, but with poor		
		facilities in need of investment. Currently owned		
		and managed by a Housing Association.		
Podsmead	PO6 – Blackbridge	Site is being developed to provide a 3G pitch and		
	Playing Field	community sports hub building. Site currently		
	, 0	owned by Glos County Council.		

(6) Sites of low quality + low community value

Consideration should be given to new or additional uses for these sites – new features, improved maintenance and clearly defined functions would be of benefit. Some sites might be considered for disposal (with all proceeds invested in other nearby open space improvement). Full community consultation highly recommended.

Ward	Site	notes		
Abbeydale	AD12 –	Management unclear – parts should be left quite		
	Awebridge Way	wild (badger sett was present on lower area), others		
		need better management.		
Coney Hill	CH1 – Maytree	Underused space on busy road with unclear		
	Square	function – seating and path through centre. Perhaps		
		plant lots more trees on the space or add extra		
		functions?		
	CH5 – Savernake	Secluded space to rear of housing and alongside		
	Rd	railway line. Backs on to Friendship Café. No clear		
		function, old bike humps. Care should be taken if		
		providing new use to take account of close neighbours. Possible food-growing space (subject to		
		contamination) or potential disposal?		
Elmbridge	EL4 - Estcourt	Series of linear spaces along Wotton Brook and		
Linbildge		Estcourt Rd. Overgrown conifer trees, unmanaged		
	Gardens	flower beds – gives an air of neglect. Could be		
		improved for wildlife (watercourse improvements?)		
		or for other uses such as food growing or fitness		
		route. One part used to house public toilet block.		
	EL5 – Cross Keys	On busy road, underused space, degraded low-level		
	Rest Garden	dry-stone retaining wall and flower beds. Could be		
		re-used for food-growing or potential disposal?		
		Mature poplar tree and fruit trees on.		
	EL7 – Horton Rd	No longer managed by City Council, but potentially		
	Cemetery	a much more pleasant space currently very		
		overgrown. Historic burial ground with gravestones,		
		managed for wildlife.		
Grange	GR4 – Tuffley	Large 'verge' on very busy Cole Ave with mature		
	Lane (The	poplar trees – potential site for disposal or		
	Gladiator)	additional tree planting/habitat work.		
	GR8 – Meredith	Site with play area under management company.		
	Way	Not well maintained and currently play area closed		
		off – play equipment needs to be upgraded and		
		suitable future management secured.		
	GR11 – Greenhill	Rather secluded space – it is unclear that it is		
	Drive	actually POS. Would benefit from better		
		management and possibly additional orchard		
		planting with wildflower margins.		

Hucclecote	HU6 – Green	Are of woodland next to housing. No clear			
	Lane/The Orchards	management plan.			
	HU10 – Bircher	Issues with lack of grass cutting etc (possibly now			
	Way (Hucclecote	resolved). Play area to be installed in this space.			
	Centre)	More tree planting would be beneficial.			
Kingsholm	KW2 – Kingsholm	Development of Civil Service site will disrupt this			
& Wotton	Rest Garden	space – issues with crumbling low-level stone wall &			
	(Estcourt Rd)	unclear function. New planting would be of benefit.			
	KW6 – Great	Space closed off due to anti-social behaviour. Future			
	Western Rd Rest	currently undecided.			
	Garden (London Rd)				
	KW7 – Great	Space underused, function unclear. May benefit			
	Western Rd Rest	from adjacent development of railway sidings for			
	Garden (Horton Rd)	housing (size may increase).			
Matson &	MR8 –	Previously a rugby pitch but currently unused for			
Robinswood	Saintbridge	sport, function now unclear, needs a new use (e.g.			
	Recreation	outdoor fitness or something else)			
	Ground				
Moreland	MO1 – Sydenham	Valuable space containing monument, but damaged			
	Gardens	paths, poor quality perimeter railing and overgrown			
		conifer trees. Needs to be given additional functions			
		for local community. Would benefit from a proper			
		railing fence to provide safe enclosure for small children and dog exercise.			
Quedgeley	QF4 – Needham	Access off private road, this poorly located local			
Fieldcourt	Avenue	space has no facilities and function is unclear.			
		Waterwells Playing Field is now very close by. A			
		possible site for disposal?			
Tuffley	TU2 -	Linear 'wild' space to rear of properties, not well			
	Brookthorpe	overlooked, poor access, no defined management plan.			
	Close				
	TU6 – Grange	Small 'wild' space to rear of properties, not well			
	Park	overlooked, poor access, no defined management			
	TU8 – Grange Rd	plan. Degraded formal flower garden. Poor quality, lack of			
	U U	function – consider new use such as outdoor fitness,			
	rest garden	food growing (or possible disposal?)			
Westgate	WE8 – Jubilee	Small, former ornamental garden 'Aviation Garden'-			
	Gardens	with plane sculptures (now relocated to Jet Age			
		Museum). Much anti-social behaviour resulted in			
		site being closed off. Consider new uses (or possible			
		disposal?). Next door to Conservative Club and			
		former Greyfriars bowling green.			

APPENDIX 4

Summary and analysis of Play Area Assessments

All of Gloucester's play areas were assessed using criteria based on the Play England *Playable Space Quality Assessment Tool.* Each site was scored from 1 (serious weaknesses, improvement needed) to 5 (excellent) against criteria for the following:

- Location
- Play Value
- Care and Maintenance

Play Value

60% of play areas scored above median for the quality of the site's play value.

The top five sites in Gloucester for play value were:

- Longlevens Recreation Ground in Longlevens ward
- Matson Park in Matson & Robinswood ward
- Sebert Street Recreation Ground in Kingsholm & Wotton ward
- Gloucester Park in Westgate ward
- Randwick Park in Grange ward

Location

51% of play areas scored above the median for the quality of the site's location/setting.

The top five sites in Gloucester for location were:

- Longlevens Recreation Ground in Longlevens ward
- Buckenham Sports Park in Kingsway ward
- Sebert Street Recreation Ground in Kingsholm & Wotton ward
- The Venture in Matson & Robinswood ward
- Napier Street in Barton & Tredworth ward

Care and Maintenance

51% of play areas scored above the median for the quality of the site's ongoing care and maintenance.

The top five sites in Gloucester for the quality of care and maintenance were:

- The Venture in Matson & Robinswood ward
- Robinswood Hill in Matson & Robinswood ward
- **Glevum Way** in Abbeydale ward
- **Gloucester Park** in Westgate ward
- Longlevens Recreation Ground in Longlevens ward

When looking cumulatively at the assessments (based on scores in all categories), there are five city council managed sites that would benefit the most from some improvement as soon as possible are:

- Parry Field (Moreland ward)
- Evan's Walk (Matson and Robinswood ward)
- The Oaks (Barnwood ward)
- Baneberry Road (Matson and Robinswood ward)
- Coltishall Close (Quedgeley Fieldcourt ward)

Three of the sites managed by Quedgeley Town Council are also recommended for improvement as soon as possible:

- Bristol Rd Recreation Ground (Quedgeley Severnvale ward)
- Woolstrop Way (Quedgeley Severnvale ward)
- Druid's Oak (Quedgeley Fieldcourt ward)

Finally, the play area under a management company at:

• Meredith Way in Grange Ward is also recommended for improvement as soon as possible.

Site	Play Value Score (%)	Location score (%)	Care and Maintenance Score (%)	Notes
Longlevens Rec	88	89	69	Ballgames on MUGA/grass pitches
Matson Park	88	69	57	Ballgames on MUGA/grass pitches
Sebert Street	86	94	63	Ballgames on small court/grass pitch
Gloucester Park	84	86	74	MUGA/skate ramps/large grass areas
Randwick Park	80	69	60	Ballgames on MUGA/tennis/grass
The Venture	78	91	77	Ballgames on adjacent field
Milton Avenue	78	77	57	Ballgames on adjacent grass area
Glevum Way	76	86	69	Ballgames on adjacent playing field
